

Dear FCC, I would like to be polite with this letter but I'm just going to put it very blunt. Keep your damn noses out of my XM programming. The big broadcast companies can't seem to provide me with the programming that I want so I pay for this service from XM. There are services such as traffic and weather that not only makes my job easier but also keeps me safe while I'm at work. You see, I'm a truck driver and it is very important to me to be able to navigate around major cities with a minimum of delays. It is also critical for me to be aware of threatening weather conditions and for some reason the big broadcasters can't (or won't) provide me with this information. Don't take away a valuable tool that I need to do my job and get myself home safely. I respectfully urge you to reject petition 04-160.

Sincerely,
Michael Burgher
